

RADEME BUDHAI

IOS/ANDROID DEVELOPER

I love to code and develop apps.

I think it's amazing to see apps move from an idea, to a design and then a finished product.

I have many years of experience developing mobile apps and websites.

EXPERIENCE

2017 -
PRESENT

+ TABLECROSS

APP AND WEB MANAGER

At Tablecross it is my responsibility to manage and maintain the code for both the iOS and Android app. I design and develop new features and do bug fixes.

It is also my responsibility make reports and give insights into user behaviors and patterns using analytics data. From there I make the best decision for development.

Lastly, I manage the website using Wordpress.

2016 -
PRESENT

+ BERLITZ JAPAN

ENGLISH INSTRUCTOR

Currently, I work at Berlitz on Saturdays.

I teach English to business men, women and kids using level-appropriate teaching techniques and language that serves to motivate and guide them.

2015 - 2016

+ THE STUDENTS' LOAN BUREAU JAMAICA

SYSTEMS ANALYST

My duties included but were not restricted to:

- Making specific proposals for modifying or replacing systems
- Producing project feasibility reports
- Performing system testing
- Providing training for new systems
- Writing queries in SQL to serve data and make reports
- Keeping up to date with technical and industry developments

2014 - 2015

+ SHIPWIZE JAMAICA

IT ANALYST

I worked at Shipwize while I attended university.

At Shipwize, it was my responsibility to:

- Design, implement, manage and maintain the company's website, iOS and Android application.
- Determine the requirements and design as well as to build, test, implement, maintain and enhance IT systems.
- Manage Shipwize on social media such as Facebook and Twitter.

While working for Shipwize I worked mainly with Objective-C, Xcode, HTML and CSS.

2013 - 2015

+ CENITECH JAMAICA

SYSTEMS ANALYST

I worked at Cenitech while I attended university.

At Cenitech, it was my responsibility to:

- Ensure that the website along with the server is always up, running and updated with the latest content such as news, contracts and projects.
- Draw up specific proposals for modified or replacement systems.
- Perform system testing.
- Provide training to users of a new system.
- Keep up to date with technical and industry developments.

At Cenitech I worked mostly with HTML and C#

EDUCATION

2010 - 2015

+ B.SC. COMPUTER SCIENCE

THE UNIVERSITY OF TECHNOLOGY, JAMAICA
